Summary

- Detail-oriented Technical Writer and Analyst specialized in creating and maintaining high-quality documentation. Holds stamp 1G visa
- With 4 years of experience in the use of content management systems and the implementation of DITA-based content strategies for efficient information architecture.
- Skilled in collaborating with cross-functional teams and managing multiple documentation projects effectively, using tools such as Document360 and Jira
- Proficient in programming languages such as Python, R, HTML, and JavaScript, as well as data visualization tools such as Power BI and Tableau to enhance technical content.

Professional Skills

Technical Tools: Content management system (Tridion Docs), Swagger, Confluence, Document360, Adobe Illustrator, ArborText Editor, Github, XML DITA, Jira, SAP ERP, MS Office, AutoCAD, SolidWorks.

Programming Skills: Python, R, CSS, JavaScript, HTML.

Data And Visualization Tools: Power BI, Tableau, MySQL.

Soft Skills Agile methodologies, Risk analysis, Communication skills, Report writing, QA Validation/Proofreading, Strong problem-solving abilities, and Team collaboration.

Experience

Technical Writer, Insolutions Global – Mumbai, IN Sept 2022 - Aug 2023

- Developed user guides, API documentation, SDKs, and UI help content for a suite of products using Document360 ensuring clarity for diverse audiences.
- Researched, outlined, wrote and edited content, working closely with various departments to understand project requirements.
- Managed the complete documentation portfolio for a prominent brand, ensuring all documents were meticulously organized, updated, and accessible to internal and external stakeholders.
- Key contributor to product and its release documentation, helping immensely in product readiness.
- Creating reusable templates for future use and maintaining version control.
- Collaborated with cross-functional teams to identify areas for improvement and provided valuable feedback to optimize system functionality and usability.

Documentation Engineer, Citec Engineering India Pvt. Ltd. – Mumbai, IN Jan 2020 - Sept 2022

- Authored 200+ operation and maintenance manuals for Wärtsilä power plants and marine engines using Arbortext Editor and Adobe Illustrator.
- Led data migration projects for ABB's software manual and worked on master data collection projects, utilizing SAP ERP and PLM Teamcenter.
- Documented New Product Introductions (NPIs), ensuring technical accuracy and compliance with industry standards.
- Collaborated with cross-functional teams to ensure accuracy and consistency in documentation.
- Implemented DITA-based content strategies to improve documentation architecture and optimize content reuse.
- Gathered information from subject-matter experts and developed, organized, and wrote procedure manuals, technical specifications, and process documentation.
- Coordinated closely with clients to ensure alignment on project goals and deliverables.

Education

University of Limerick, MSc. in Business Analytics (2.1 Honours)	Sept 2024
University of Mumbai, B.E. in Mechanical Engineering (2.1 Honours)	July 2019

Publications

Latent cooling system	2019
International Journal of Scientific and Engineering Research.	
Solar thermal air conditioner using liquid desiccant dehumidification and IEC	2019
Journal of Emerging Technologies and Innovative Research (JETIR 2019)	

Projects

Healthcare Workflow Optimization Project	2024
- The development of a cloud-based healthcare diagnostic platform that optimizes patient data analysis, resulting in quicker and more accurate diagnoses. - Technology Used: Google Cloud Platform (GCP), Google Cloud Storage, Dataproc, BigQuery, Python, PySpark.	
Data Centers Responsible for Climate Change	2023
- Analyzed the environmental impact of data centers by processing large datasets related to energy consumption and carbon emissions and utilized Power BI to create interactive dashboards and visualizations that demonstrated the correlation between data center operations and climate change. - Technology Used: Power BI, Microsoft Office	
Solar Thermal Air Conditioner	2019
Developed a working hybrid cooling system combining latent and sensible cooling, utilizing tri-ethylene glycol as a desiccant.
